## Advertising and exhibition systems

More than 30 years of experience

# About the Company

The ELSTAR Company was founded in 1984 in Poznań. For over 30 years it has been consistently strengthening its position on the market as one of the most innovative companies in the advertising-exhibition industry in Poland as well as in Europe. Currently, ELSTAR is a leading producer of advertising and exhibition systems in Poland.

There are four brands in the ELSTAR group. Expo & Retail deals with providing aluminium profiles for the advertising and exhibition industry. Truss System takes care of the production of traverse structures. Display System creates modern presentation systems. Flooring Solutions offers floor coverings for events and fairs.

## Our own production departments

We produce diverse solutions in the field of presentation systems. We offer full service in preparation of technical drawings, selection of appropriate elements and their production. Due to innovative solutions and technologies, such as computerized control of devices, our machines ensure high precision of execution and thus the highest quality of the manufactured products.

## Large storage areas

## We focus on relationships

A partnership approach to our clients has resulted in numerous jointly completed projects, which may be encountered in several places located all over Europe. For several years we have been collaborating with the same providers, which also confirms our commitment and loyalty to our business partners.

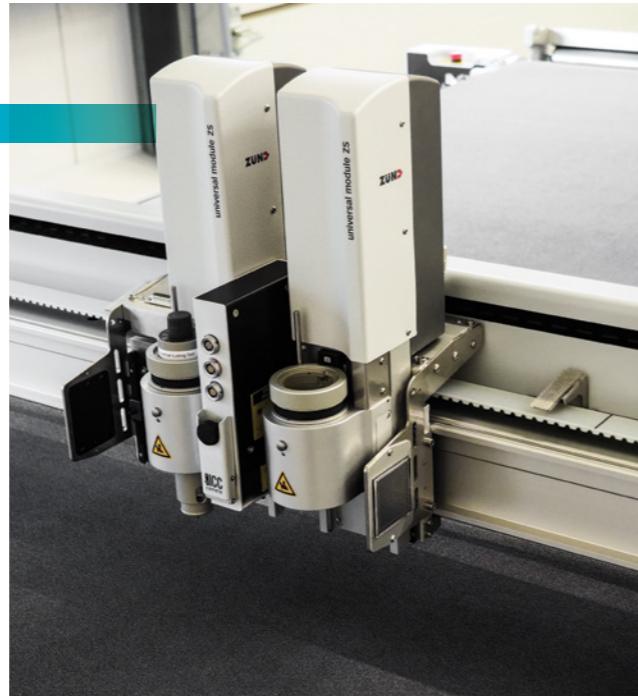

## Office space

The office and showroom with a systematically actualized exposition and a modern production hall constitute an inspiring surrounding for our team as well as the visiting guests. In our building there is no shortage of space for creative work – a Concept Room overlooking a forest.

## Precise cutting

The most novel cutting technology which we employ due to the use of the ZUND plotter is a tangible proof of our precision. Multitasking the device allows for its diverse application. This enables the creation of a broad range of services and guarantees extraordinary productivity while maintaining the highest quality of the product.

## Modern Machine Park

The most advanced technologies of our machine park contribute to a huge production potential. Devices such as the Mimaki sublimation plotter, CNC milling machine, Monti Antonio calender, Cronos Ultimate sewing machine and ZUND cutting plotter provide the assistance needed to obtain the highest quality products. We can also manage non-standard projects and the effects of our work are appreciated by the group of our loyal clients. We control the processes at every stage – from idea to its realization so that the final product is perfect in every detail.

sold

## We set new trends

We frequently introduce novel solutions for the advertising and exhibition industry in Poland.

## We adapt to Your needs

We make every possible effort to create and improve the offered solutions in order to make them simple to assemble, functional, easy to transport and, most importantly, to ensure that they meet the needs of our clients.

## We are developing for our clients

The extraordinary versatility of our actions is what distinguishes us from other companies. Our brands are the solution for the constantly changing demand of clients from different industrial segments, and their offers complement each other.

Everything  
that You need  
under one roof

A broad range of products allows for a comprehensive customer service in one location, which is an invaluable asset in the advertising-exhibition industry, where time matters! In turn huge storage facilities guarantee permanent availability of the necessary goods and deliveries carried out in JUST-IN-TIME mode.

We believe that You will want to use our solutions during future projects.
