1. ABOUT EASY FRAMES

MODULAR exhibition system, for quick assembly without tools. Modular frames, which are almost completely screened by graphics on fabric or panels, make EF modern and effective.

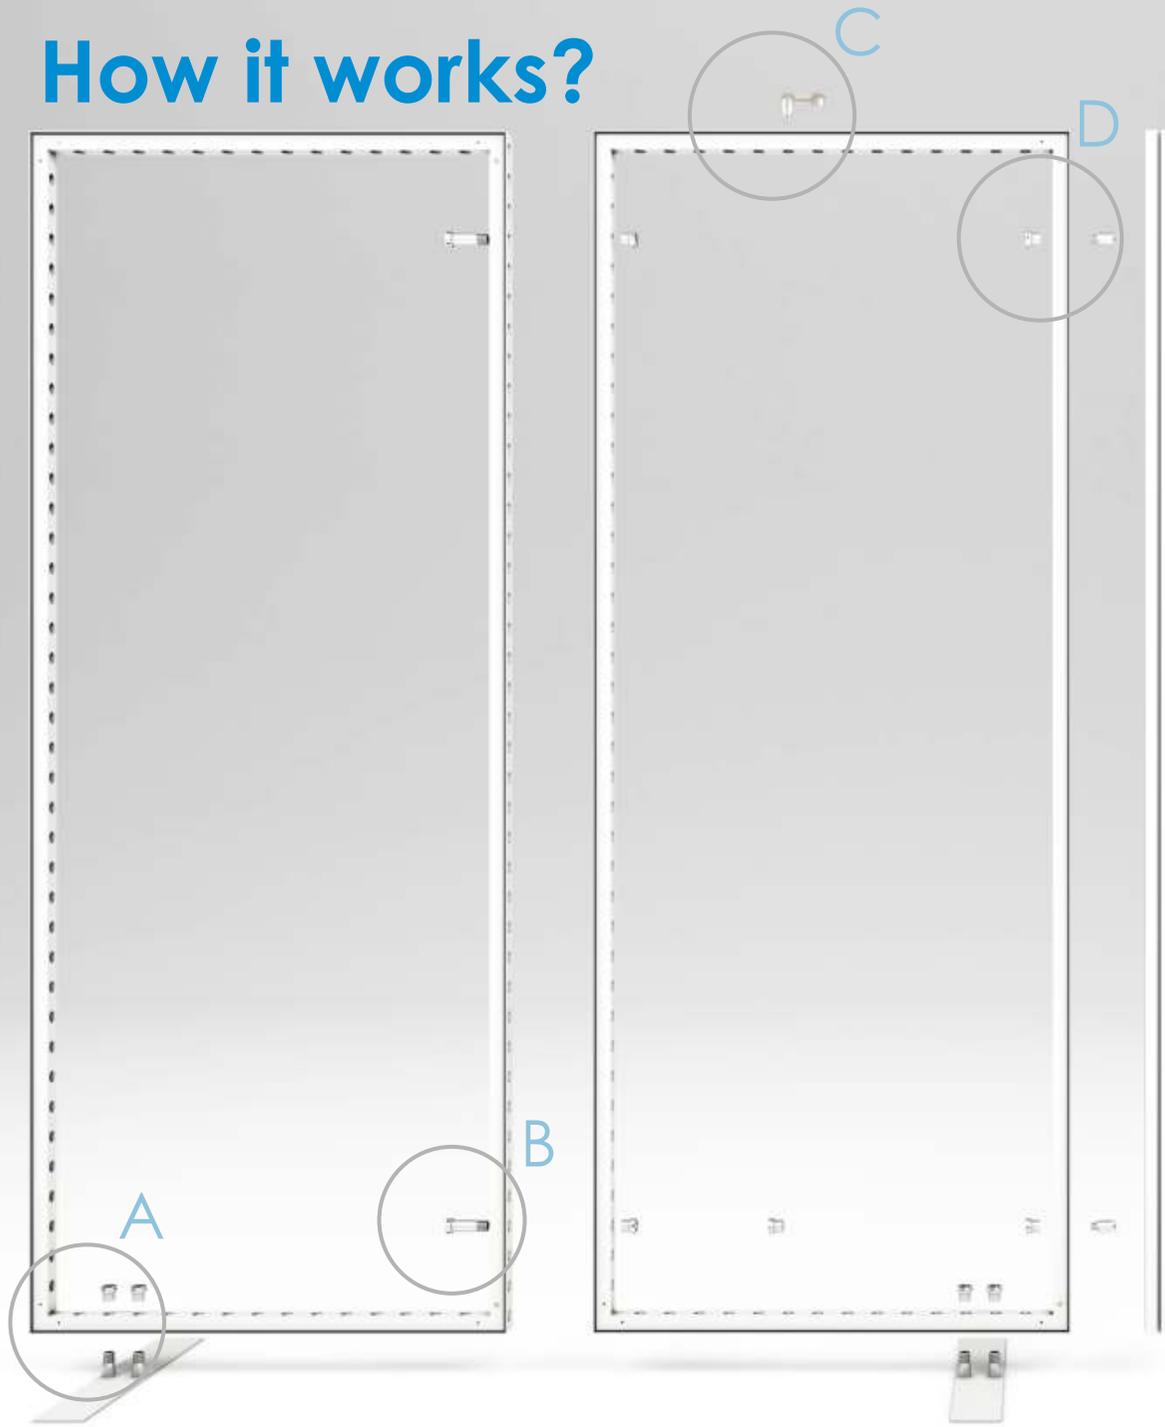

MULTIPLE USE system - combining frames in any configurations, quick graphics exchange gives countless possibilities for the system application any time it is needed.

ECONOMICAL system, gives quick return of your investment. Thanks to its biggest advantages: easy installation and the possibility of multiple use, it saves time and results in lowering labor costs.

ECOLOGIC production technologies, the use of recyclable materials are the crucial advantage of the system. The use of EASY FRAMES does not generate waste for disposal, thus protects the environment.

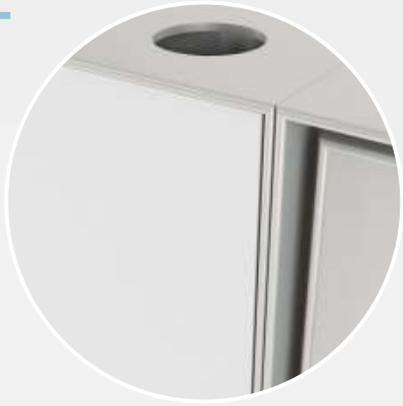

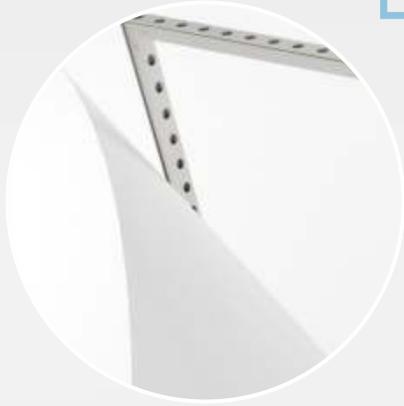

How it works?

D

E

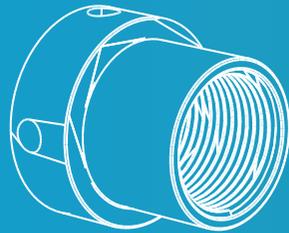

E

The system is based on the idea of multiple use of aluminum frames in various configurations. As an infill you can use changeable graphics (panels or fabrics). The installation is simple and intuitive – without any tools. The frames are connected through connectors.

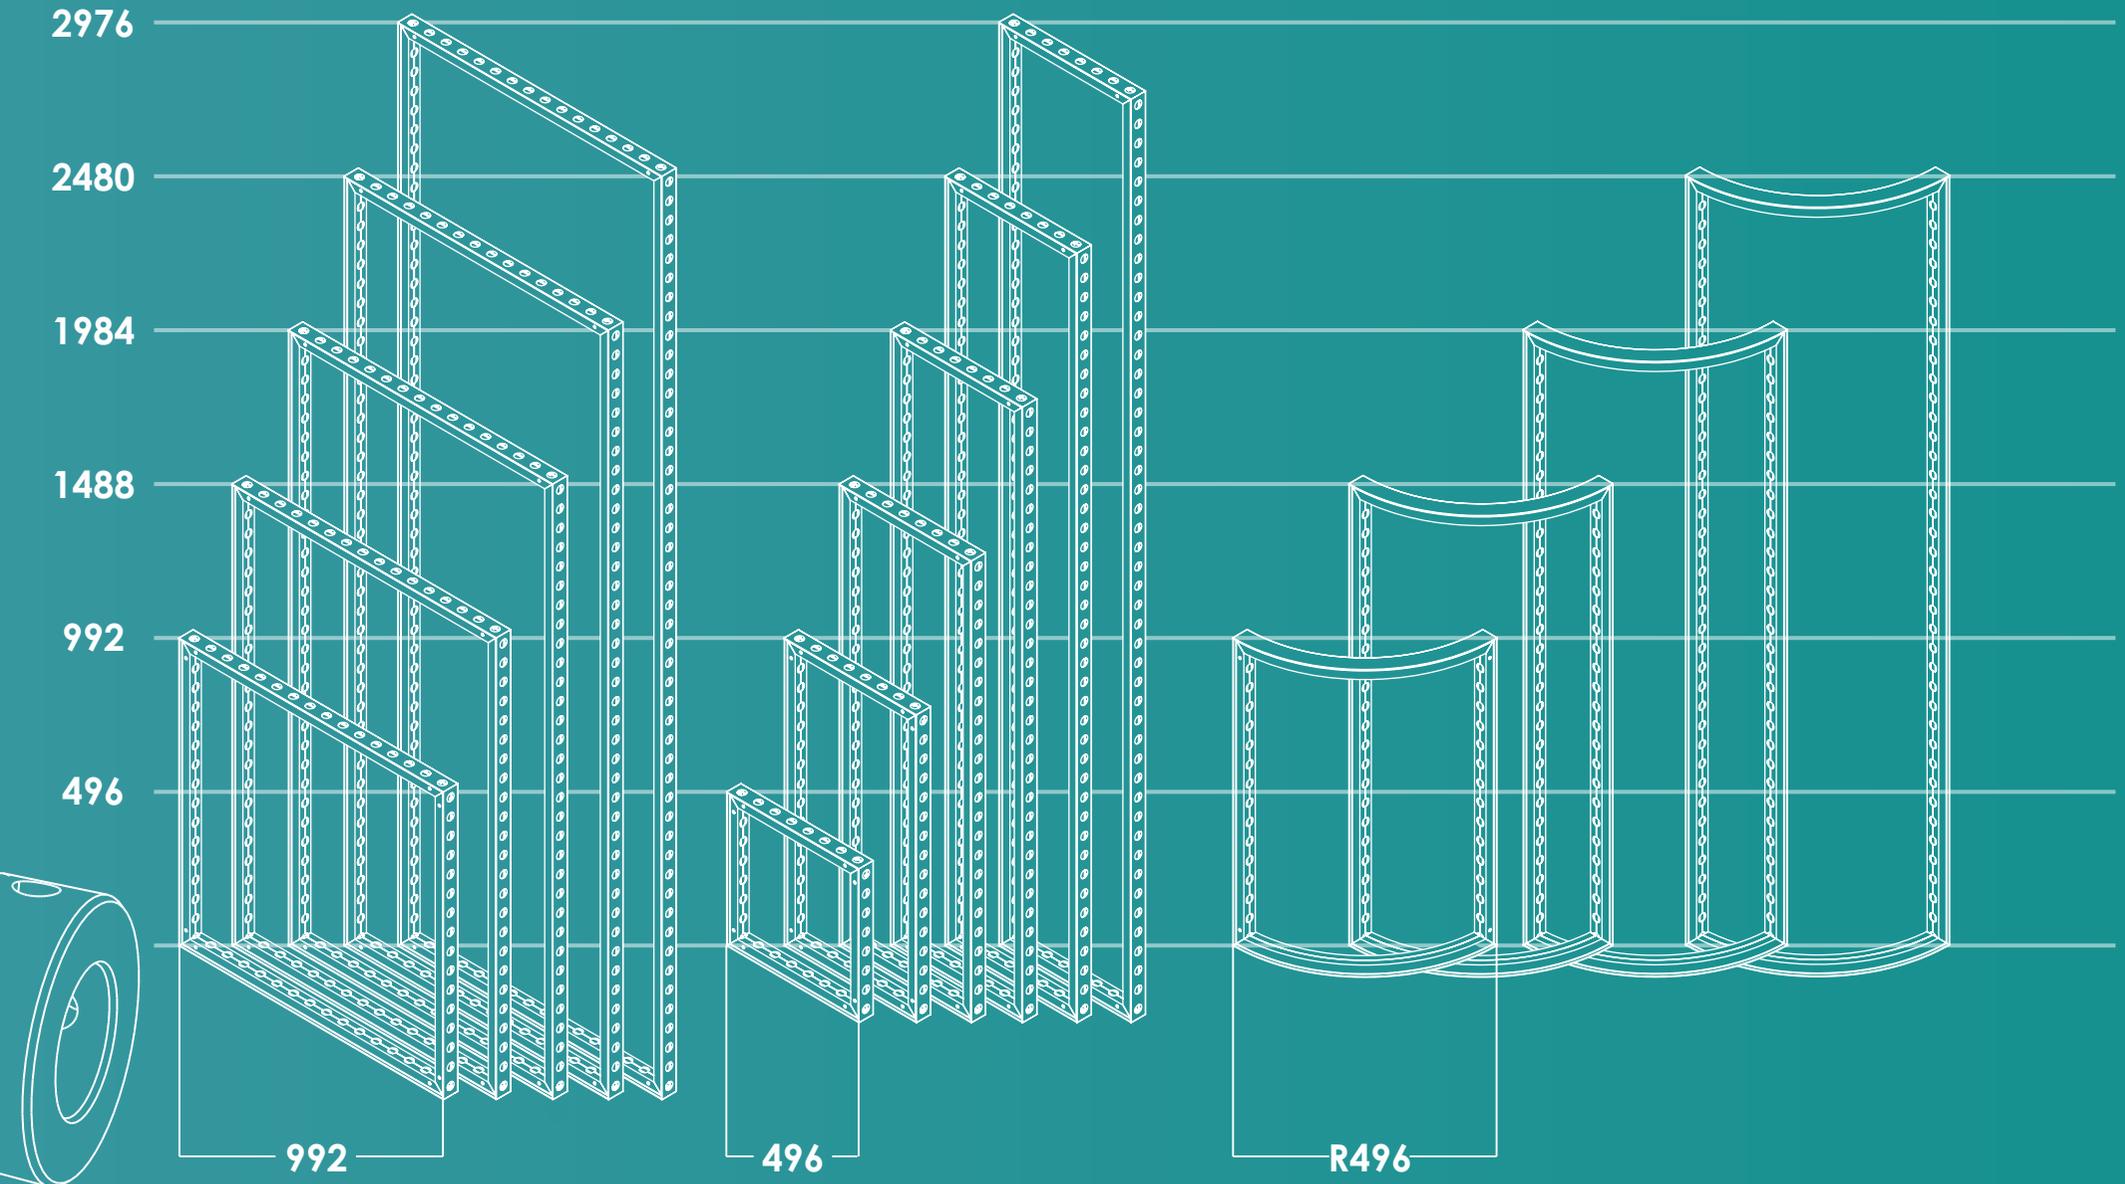

EZ FRAMES 55

The basic frames of the Easy Frames system with holes around. The frame is only 55 mm thick and matches both fabric and panel on both sides of the profiles. There are 3 types of the frame, in widths: 496 mm, 992 mm and in the bent version R496 mm.

FURNITURE FLOOR UPHOLSTERY

Solid, large-size stands filled with printed PVC panels.

The biggest advantage of our system is its intuitiveness and speed of assembly.

Build your booth in
minutes without
effort.

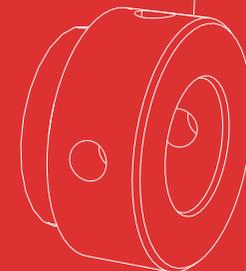

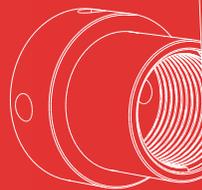

Combination of
panel infill and
textile fabrics in
one system.

EZ FRAMES 80

Another frame forming the Easy Frames system with holes around. The frame is 80 mm thick and matches both fabric and panel on both sides of the profiles. There are 2 types of the frame, in widths: 496 mm, 992 mm.

EZ FRAMES 55 & 80 ECO

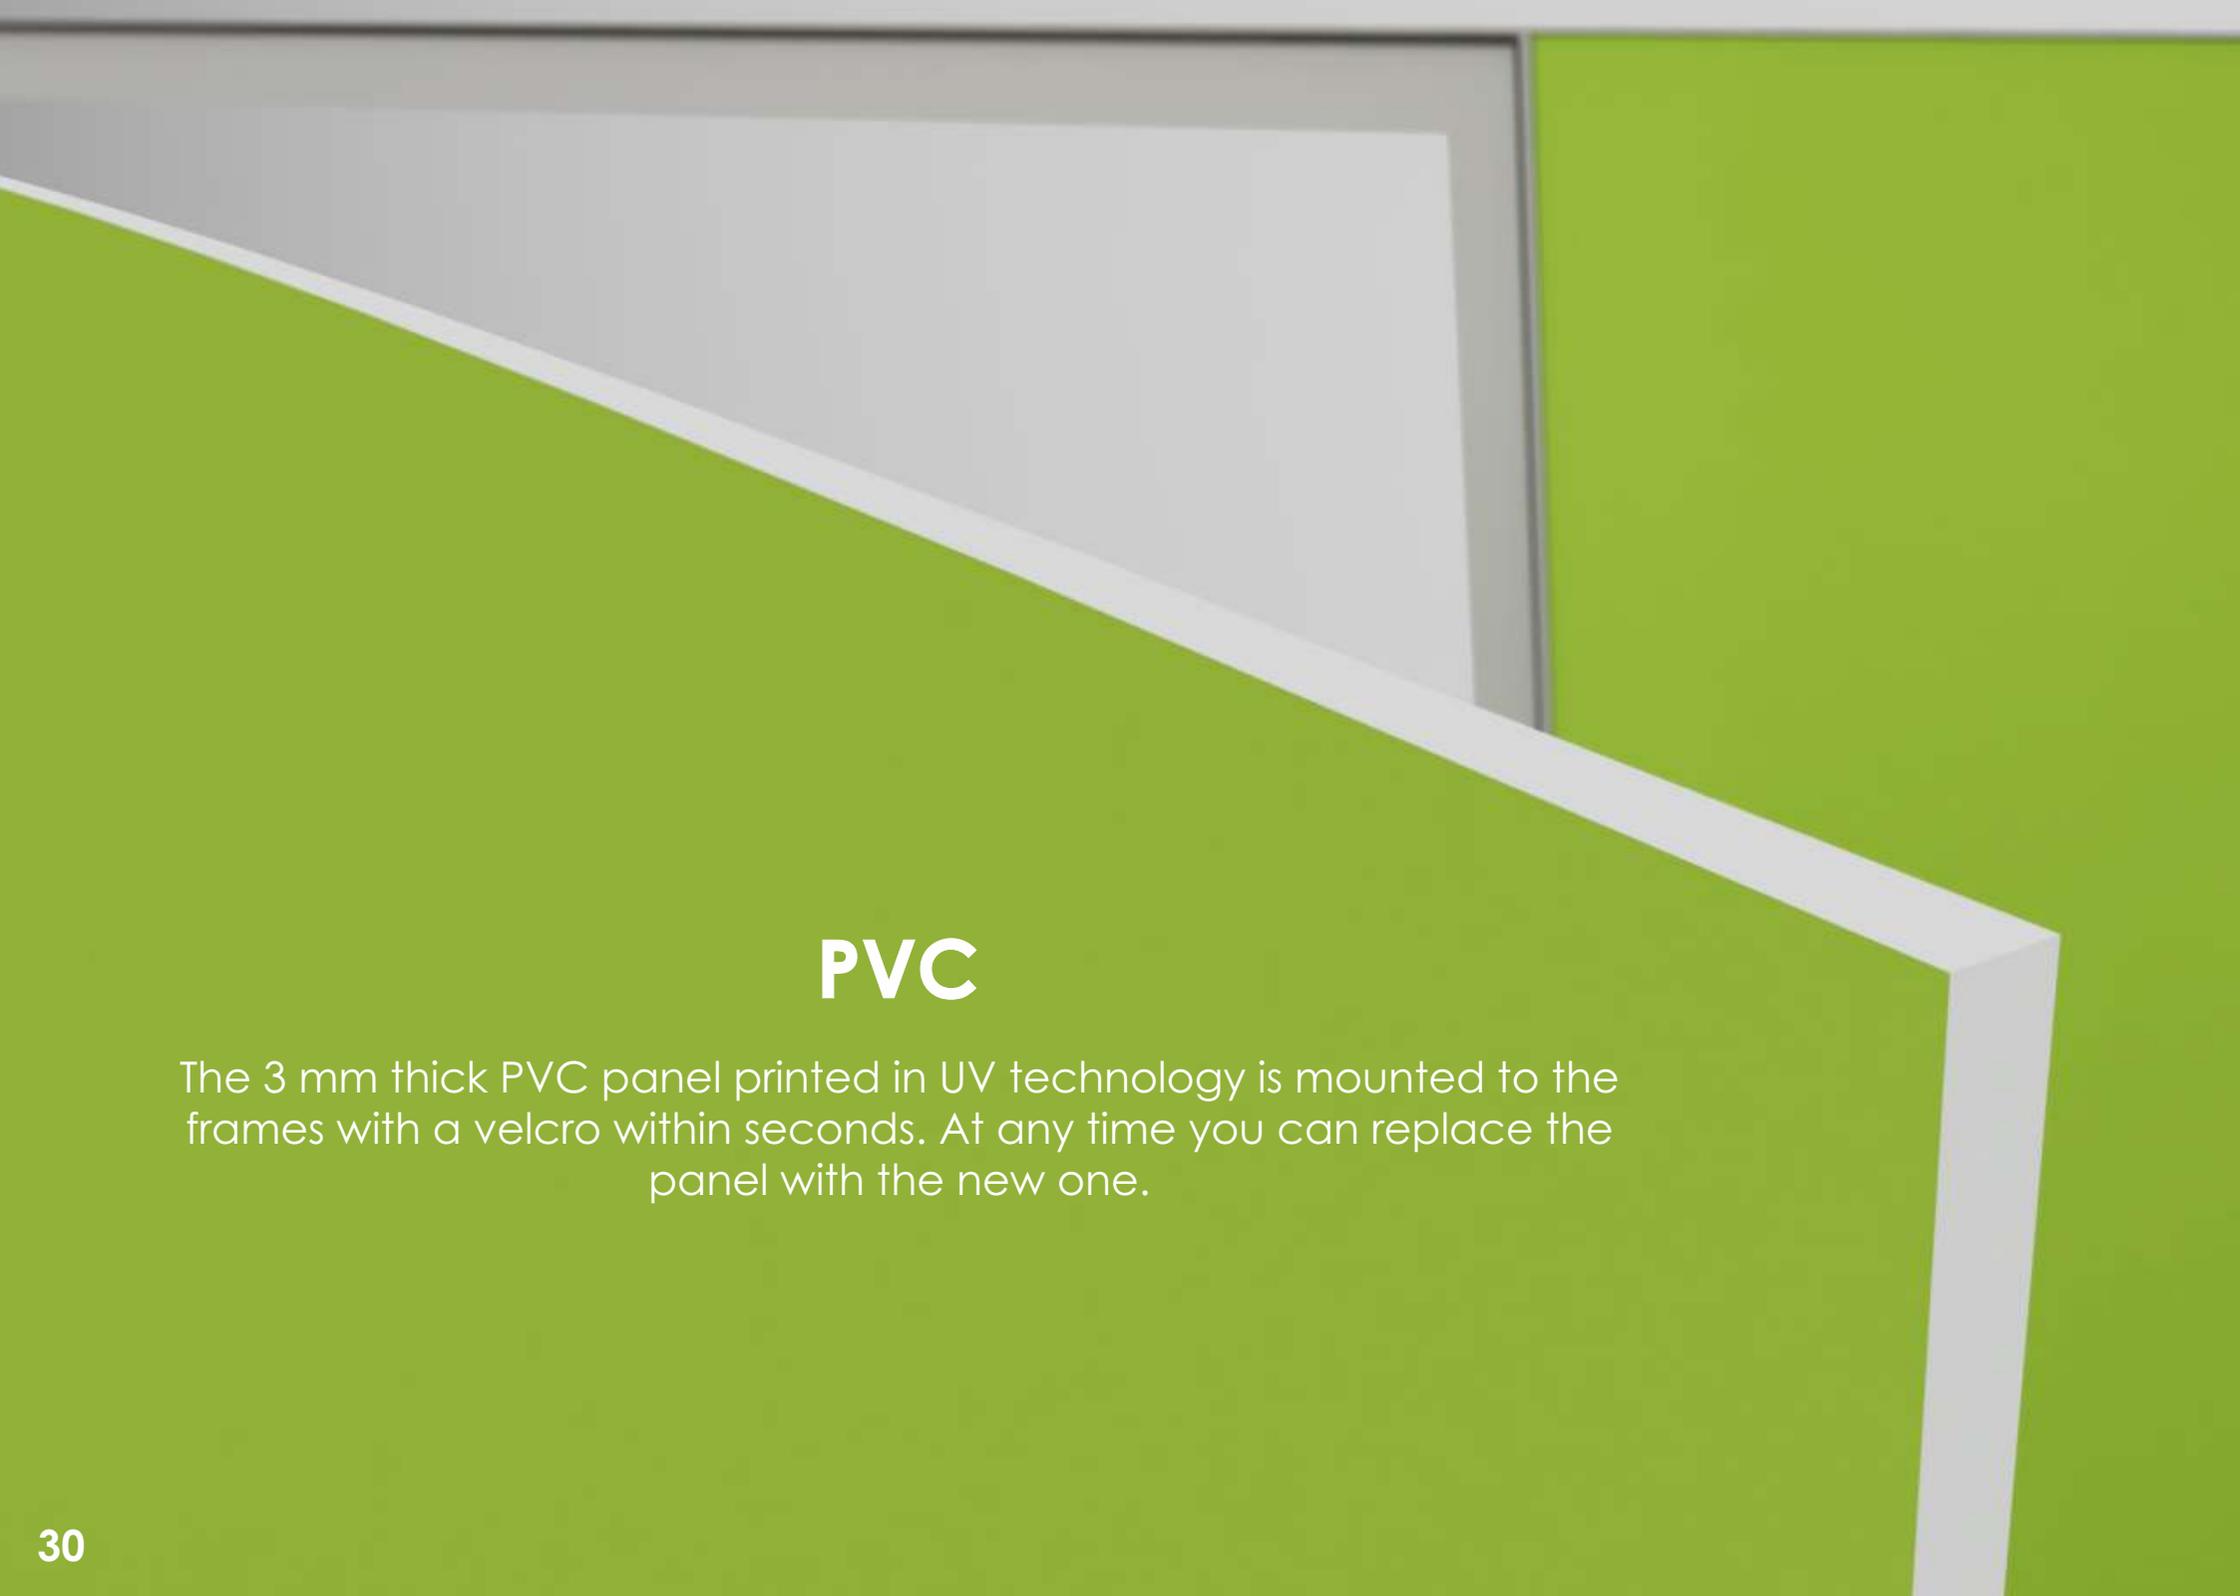

2480,00

The 992x2480 mm frame is now available in ECO version - with fewer holes. The brand new ECO frame you can find in both options: EZ 55 and EZ 80.

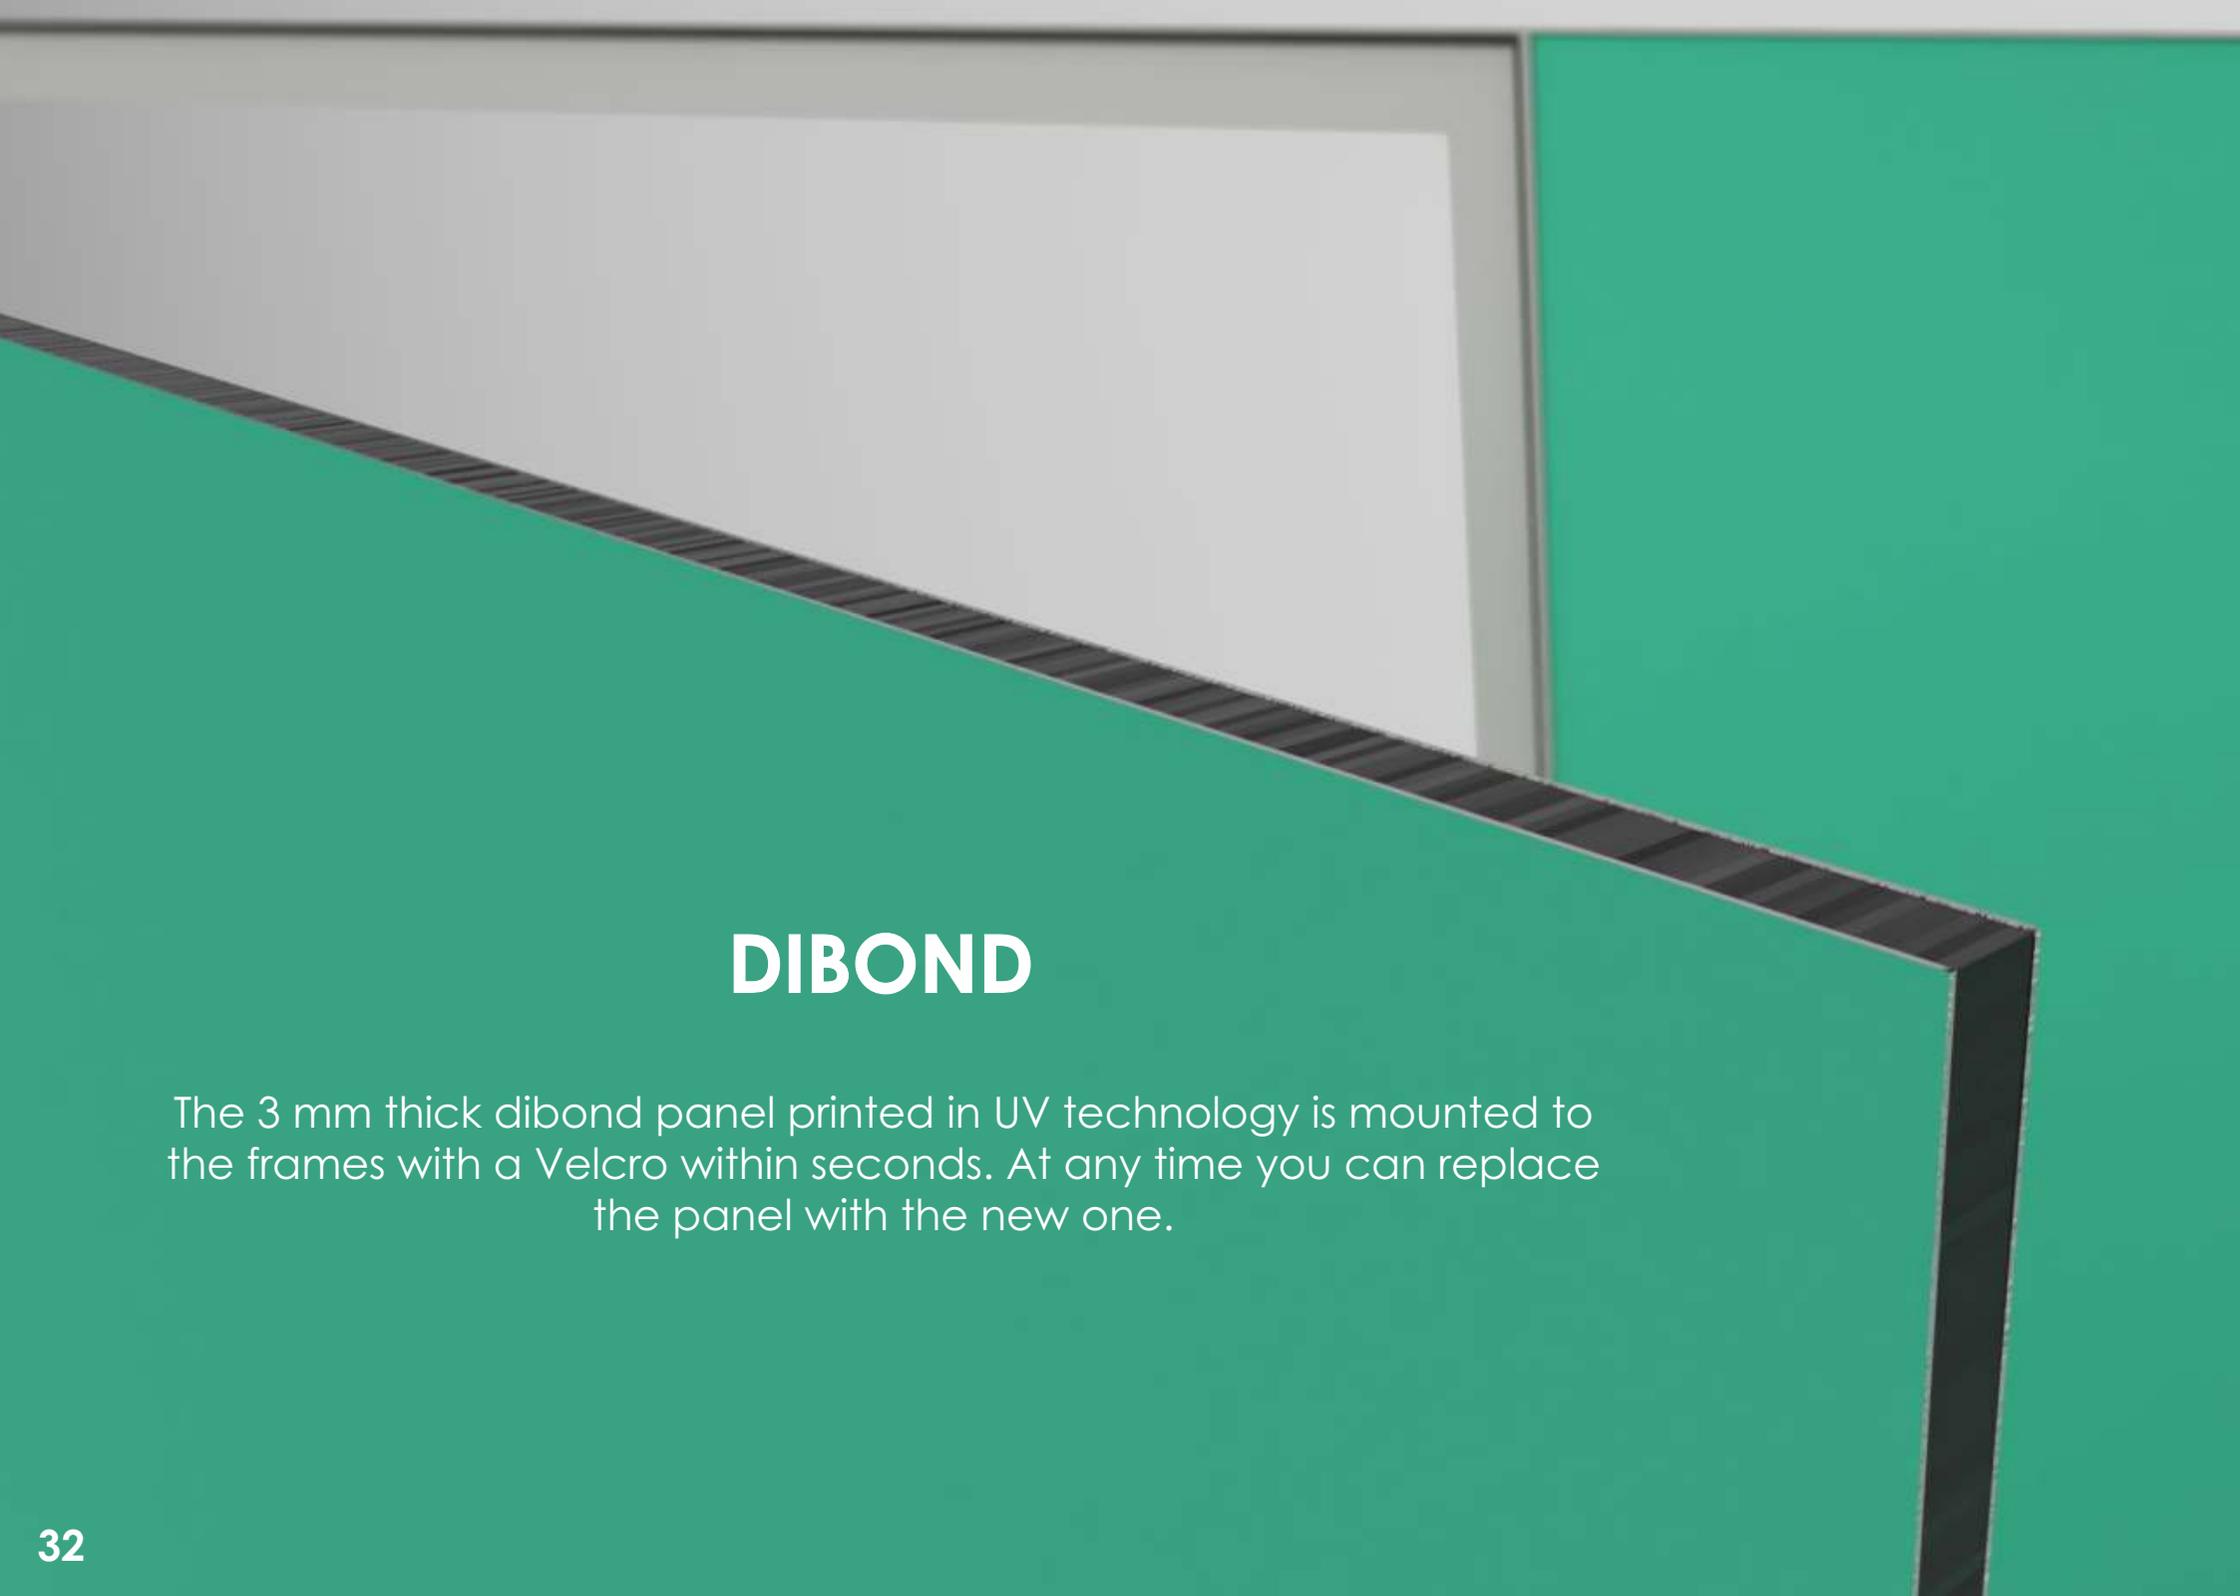

INFILLS

PVC

The 3 mm thick PVC panel printed in UV technology is mounted to the frames with a velcro within seconds. At any time you can replace the panel with the new one.

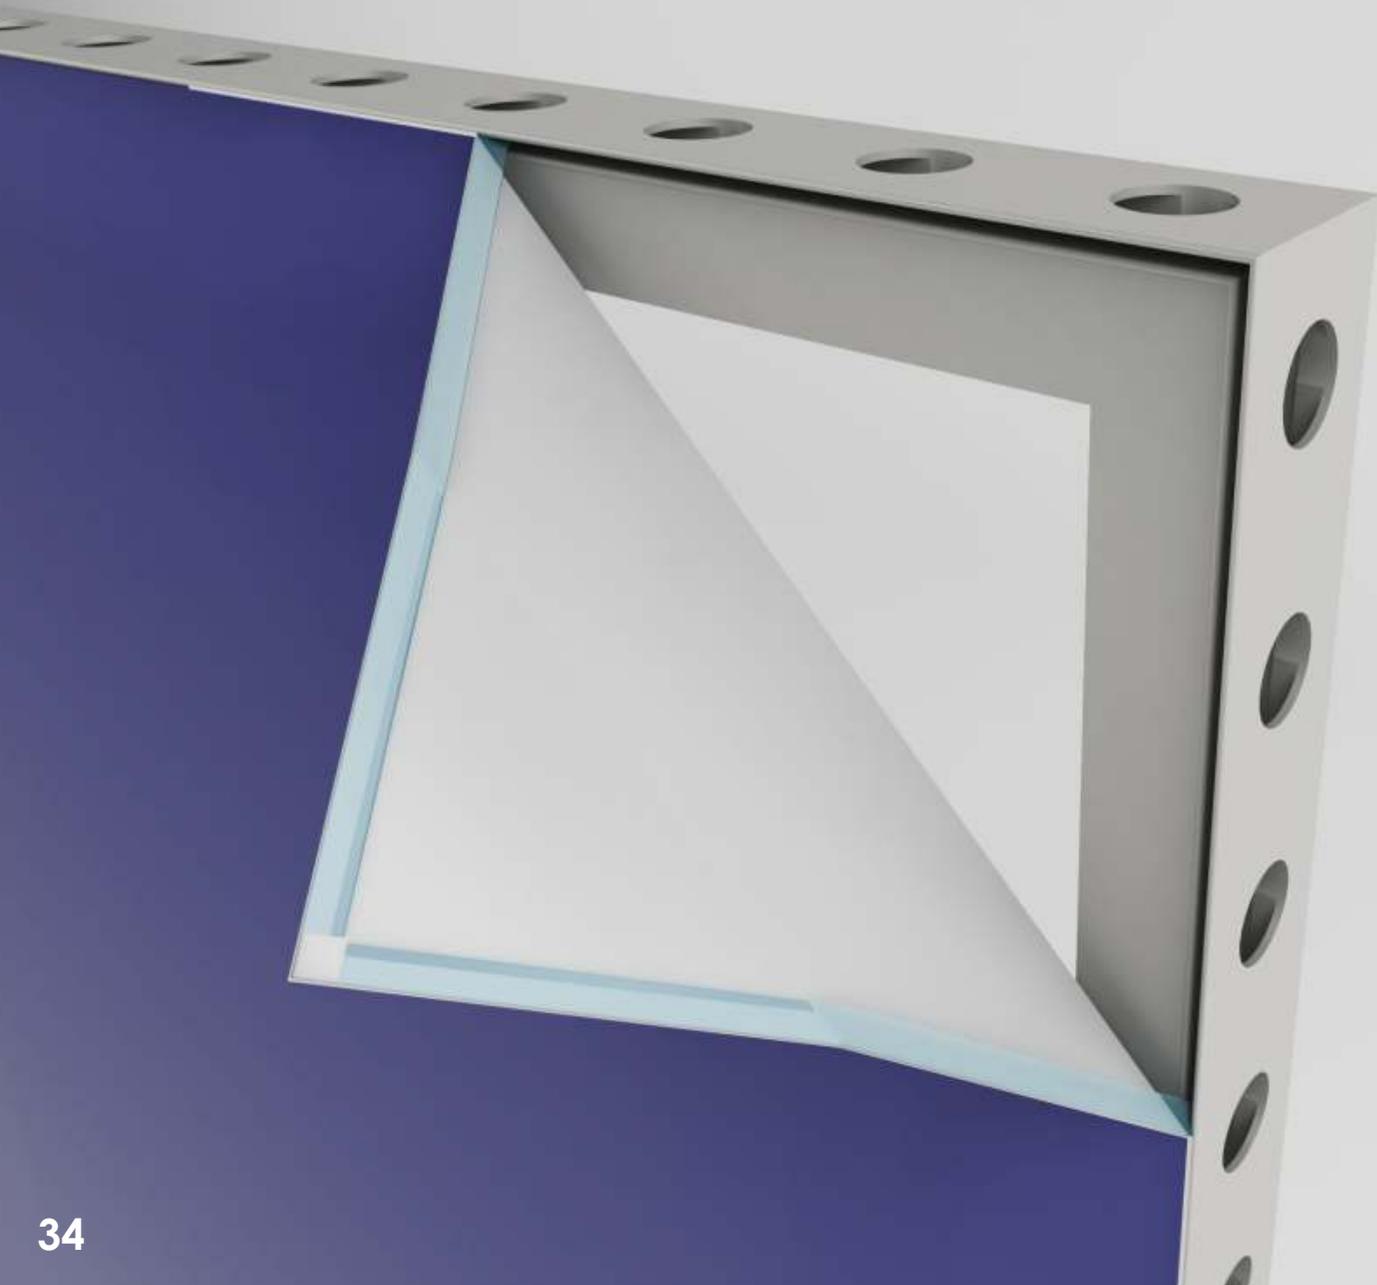

DIBOND

The 3 mm thick dibond panel printed in UV technology is mounted to the frames with a Velcro within seconds. At any time you can replace the panel with the new one.

FABRICS

Polyester fabric printed in sublimation or UV technology attached to the frame with a silicone seal within seconds. At any time you can change the graphics for the new one.

FRAMES

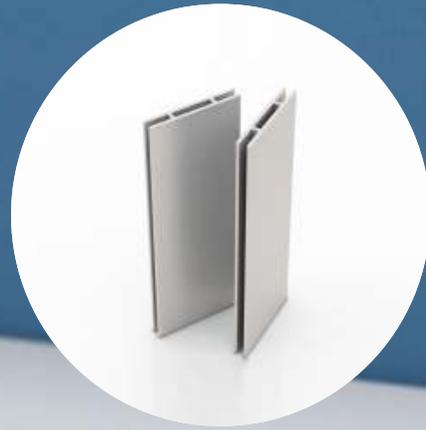

ACCESSORIES

SHELVES

The shelves can be attached at any height without damaging the graphics on pvc panels or fabrics

We offer a full range of accessories for the construction of the stand: shelves, floor systems, LCD holder, supports, base plates, etc.

H PROFILE

The profile allows for mounting of shelves to the stands, exhibition walls, without any tools.

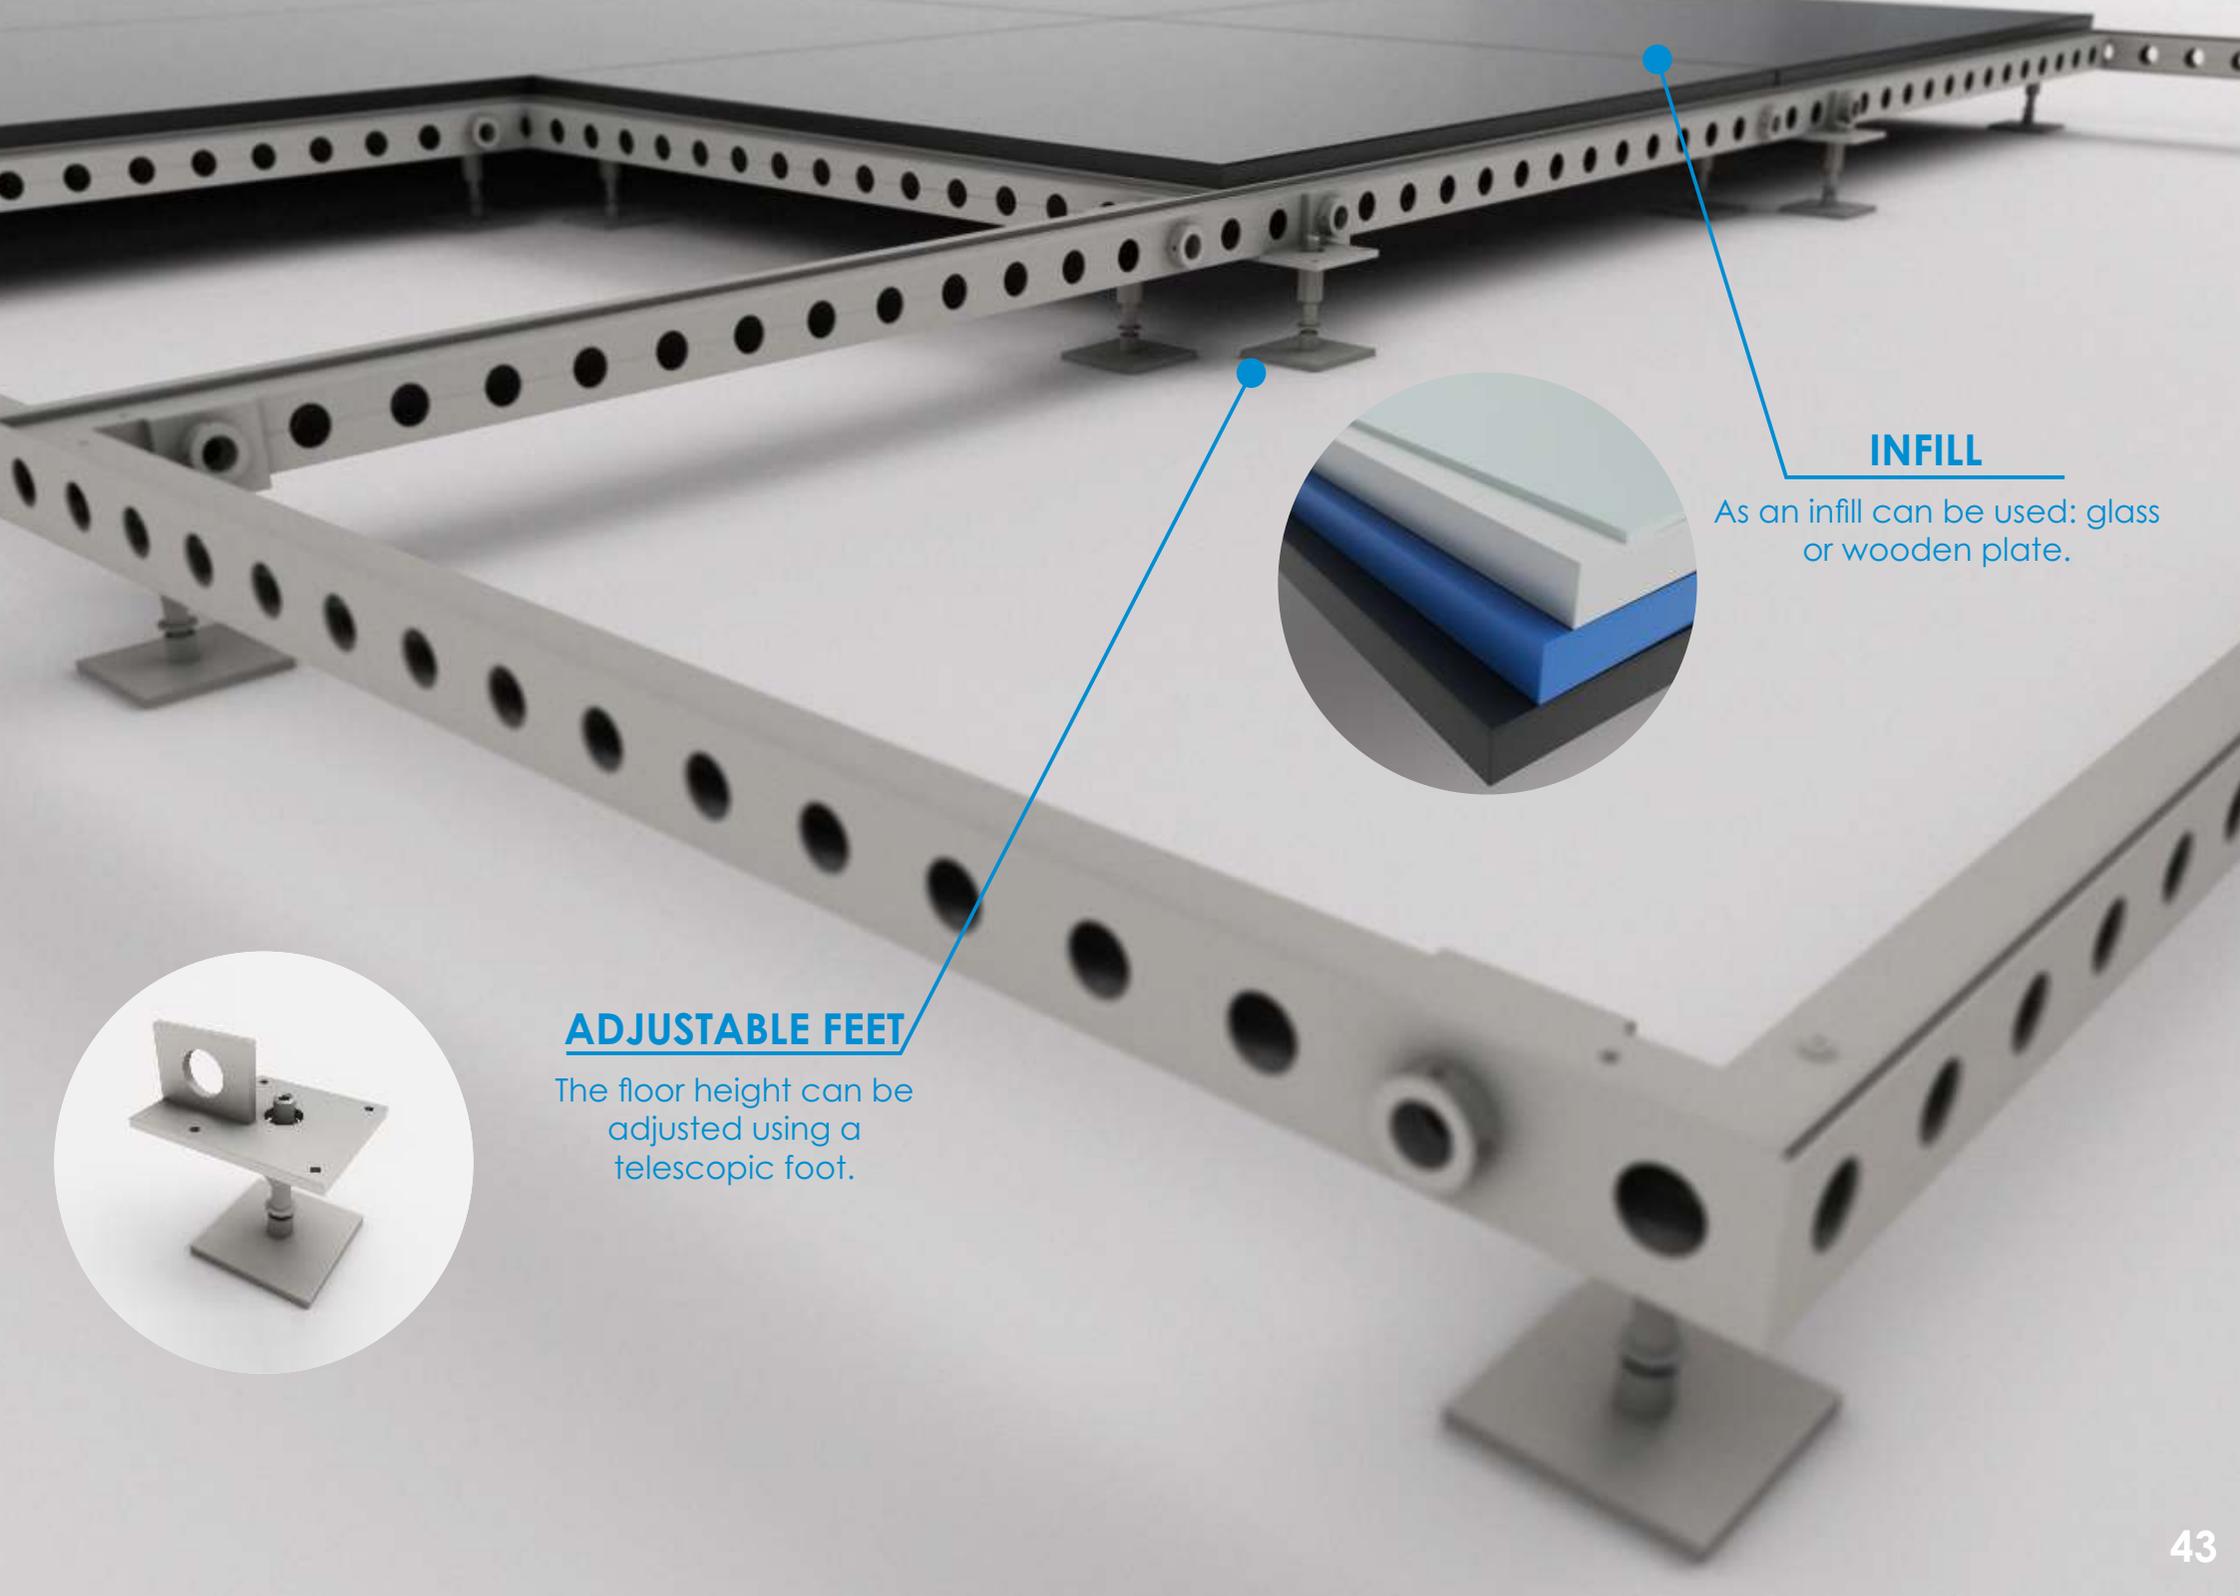

SHELF SUPPORT

Steel bracket powder painted, attached to profile H.

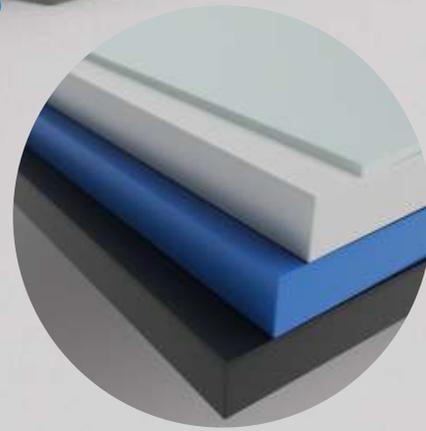

RAISED FLOOR

A raised floor based on the easy frames system is not only easy to install, but its height is also adjustable. The system is based on joining the frames together in modules and filling them with glass or wooden infill.

INFILL

As an infill can be used: glass or wooden plate.

ADJUSTABLE FEET

The floor height can be adjusted using a telescopic foot.

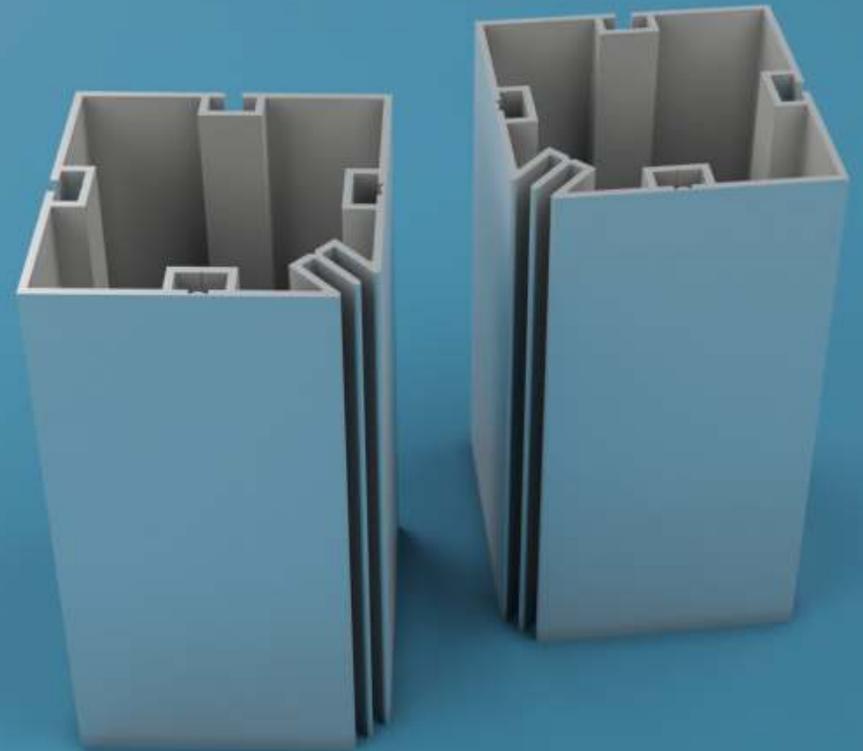

EF55 EDGE

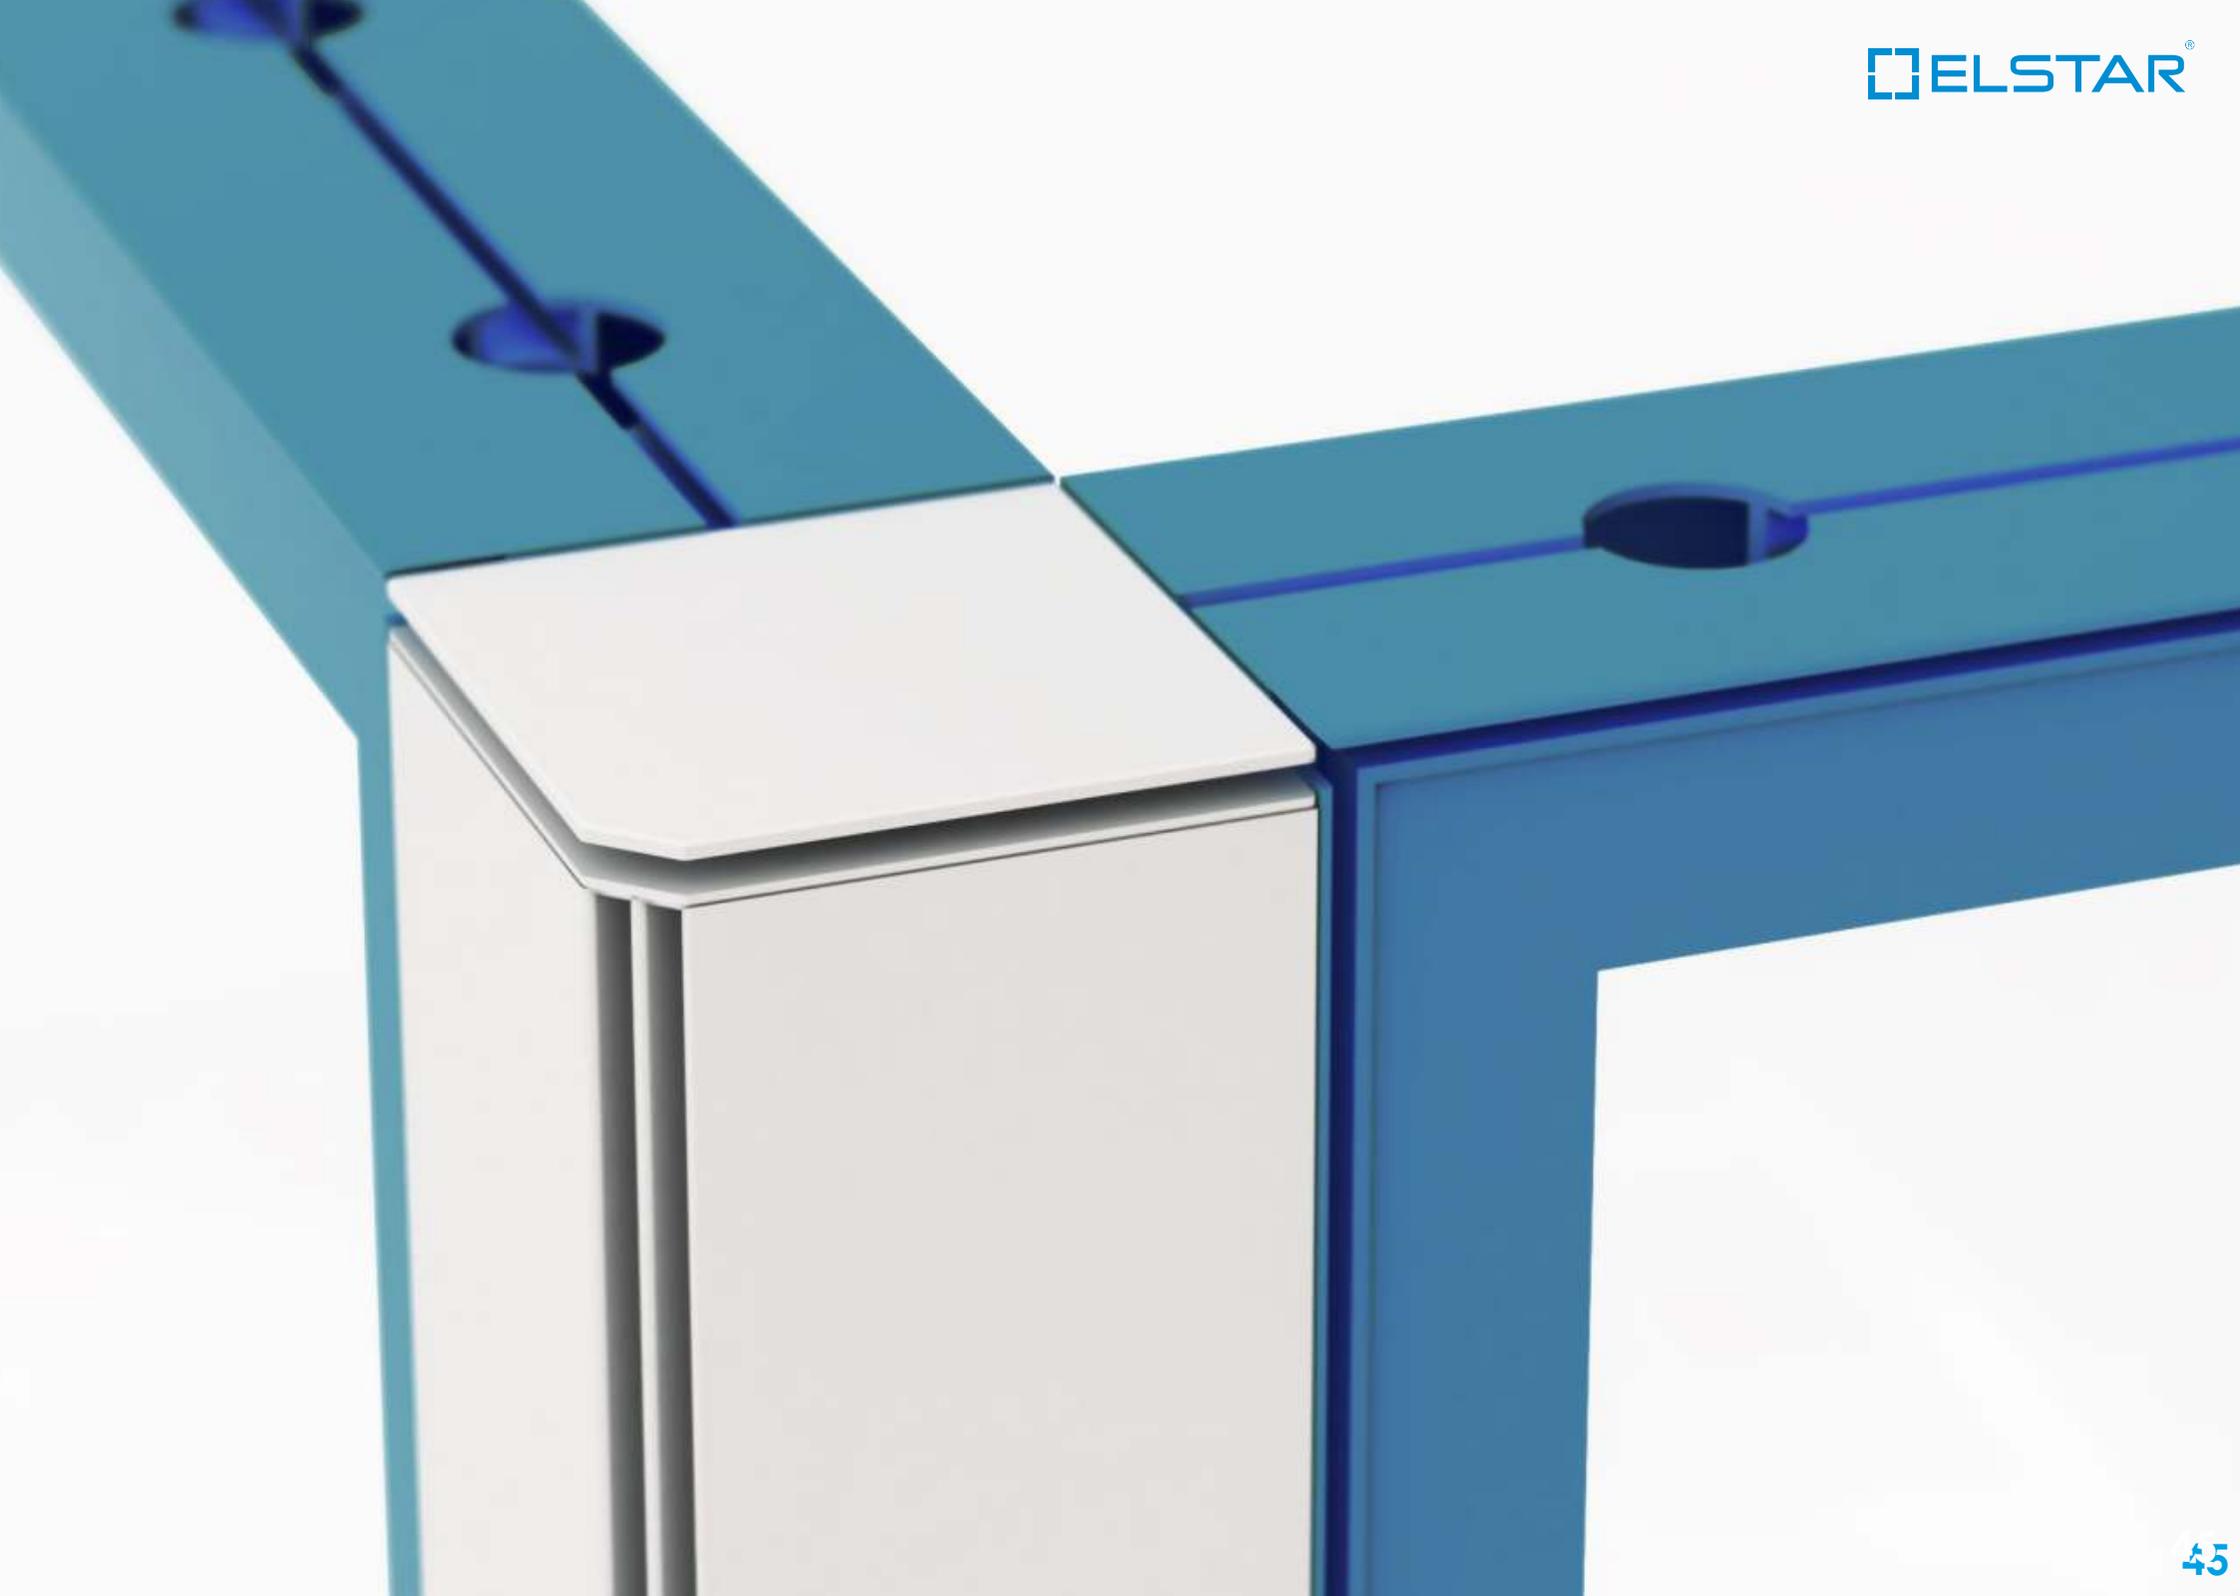

This profile is the perfect finish. It screens the profiles giving the perfect, neat and very modern construction as a result. Fixing Eltex EDGE profiles to the outer corner of the structure ensures full coverage of the profiles with a textile fabric. Compatible with our EASY FRAMES EF55 modular frame system.

MX80 EDGE

Thanks to the application of EF 80, the aluminum structure is fully covered, resulting in a neat and modern look of the stand. Profile designed to cover aluminum structures. Eltex 80 EF profiles used with MX 80 system, offers unlimited possibilities in creating exhibition stands.

COMPATIBILITY

COMPATIBILITY

The wall system based on the Easy Frames and MX systems offers the best solutions of both systems. It combines modern design with the advantages of a modular system, with invisible aluminum structure. Using different materials allows you to create an individual, tailor-made project. Building such a stand takes very little time, and due to its repeated use is an excellent investment.

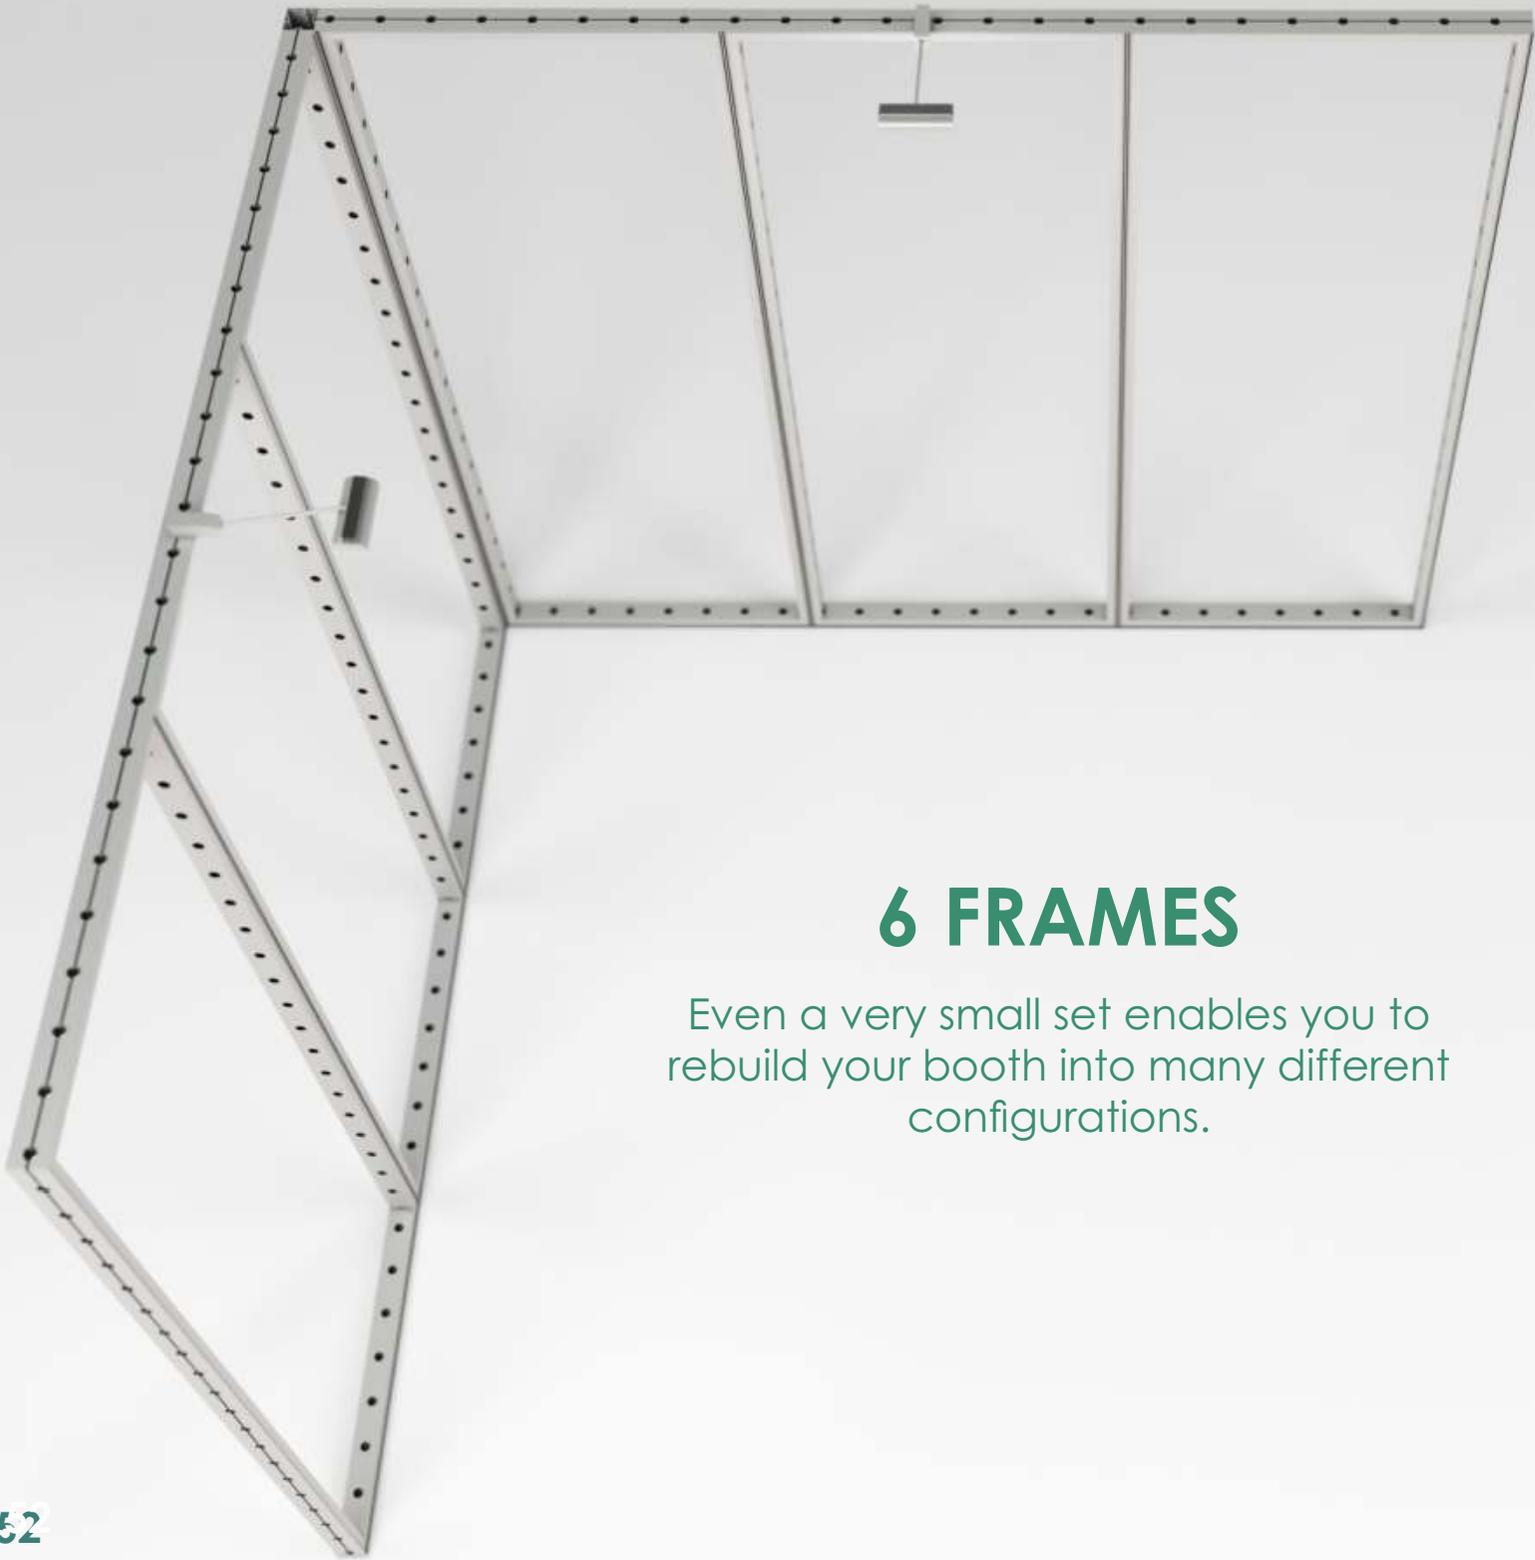

EZ80 + MX

EZ 80 profiles are compatible with our classic MX 80 exhibition system. It enables building large-size structures based on stable MX profiles with the option of expanding the stand with modern, modular Easy Frames segments.
